

Basic Arguments

`x, n, Hr, a, b,
factor_levels`

`mult_bf_informed()
binom_bf_informed()`

`$bf_list` `$cred_level` `$restrictions`
`$bridge_output` `$samples`

`summary()`

`bayes_factor()`

`samples()`

`bridge_outut()`

Results and posterior parameter estimates

`$hyp` `$bf` `$re2` `$bf_type`
`$prior` `$data` `$nr_equal`
`$nr_inequal` `$cred_level`

`$estimates`

Information about computed Bayes factors

`$bf_table` `$error_measures`

`$bf_ineq_table`

Samples from constrained densities used for bridge sampling

`$prior_samples`

`$post_samples`

Bridge sampling output and error measures

`$eval` `$niter` `$logml`

`$hyp` `$error_measures`

Posterior median and credible interval of marginal densities under encompassing model
